

I'M AN ENERGETIC, PASSIONATE INDIVIDUAL who strives to create compelling design. I combine instinct and experience with an in-depth understanding of typography, layout, color theory and design principles to do this effectively. I work collaboratively and listen to feedback, which ultimately creates not only a better product, but fosters a better work environment. My ideal career goal is to work as a hands-on designer in a progressive and talent-rich studio where together we create tomorrow's design, and have fun doing it.
